

## Far more than consulting...

---

### WHO WE ARE

Great Circle Services AG is one of the leading aviation safety consulting companies in Switzerland. Established in 2005 by a dedicated team of airworthiness and flight inspectors, GCS pioneered many safety initiatives through numerous training courses, audits and consulting projects.

**OUR VISION** We are leaders in the safety domain and enable our clients to grow beyond their abilities through unrivalled systemic consultancy services. We offer applied, unrivalled solutions that generate true long-term value to the benefit of our partners.

**A GREAT PARTNER TO WORK WITH** Safety and Compliance are important aspects within the operational (risk) management of organisations. Most safety-related topics are statutorily supervised and ultimately constitute a direct exposure on our clients corporate or even their personal reputation. We resolve ambiguity in a qualitative and cost-effective way, by:

**Listening** to our client's needs to assess and customise our service levels;

**Sharing** our experience to ensure risk-aware, safe and statutory compliant organisations;

**Enabling** and coaching professionals to master highly complex statutory and volatile business environments;

**Encouraging** applied business practice and learning organisations.

**SAFETY SOLUTIONS** reflects the dynamics and flexibility required to deliver outstanding results. When it comes to safety aspects of operating aircraft, there shall not be any trade-off. We act as facilitator and bridge any know-how gaps or time constraints in this critical topic within the aviation industry.
